I am referring to site 1º R 126 of a Map daied 17/5/2013 which was discussed at Hatta P.C neesing on 4/4/2013. I am questiming the Council's inclusion of Land which is ensently classed as being Budbrooke but shown as part of an extended Hattan Park? Has a decision already been reade over the village Boundary changes without any local consultation? The entire sile is in the green belt, partly the Oaklands tasm sise and a sepisale field belonging to another Candowner. The needing at Hatton confined the capacity to build 40-80 houses on it. My objections WE that the stretch of Bisminghan Road from the A46 Island to Hatton Pask Island is notoviously busy aar accident black spot particularly close to Oaklands Fary. The A4177 is a major access rouse to Warwick with this green corridor providing a first impression in the the storic country town and surely plays an important part in our tourist influence for visitors—The site is visables bush and topen aspect to both road & canal area users. is highly valued. No new housing development could rival this and would only do inveversible hard to the landscape. I cannot envisage any multiple housing development would resolve my objection on this Sile. I am also concerned about the prential health issues of sixing homes new a persol Station

Object

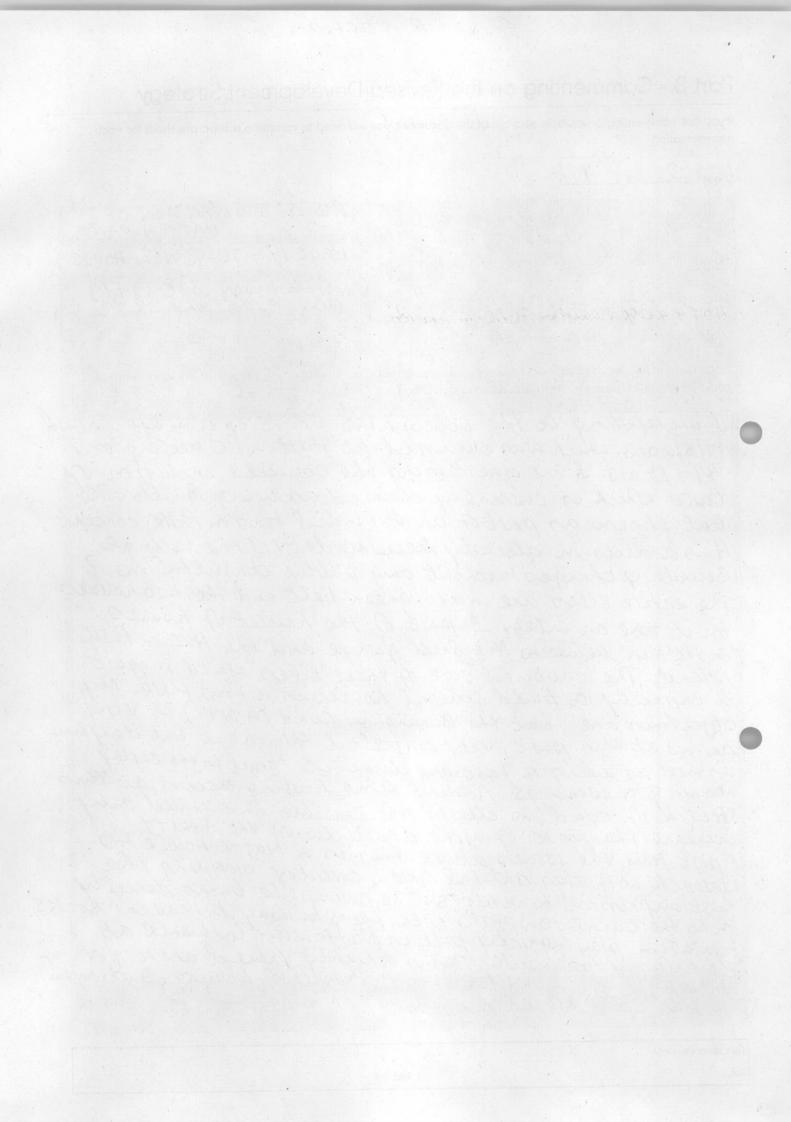

Please set out full details of your objection or representation of support. If objecting, please set out what changes could be made to resolve your objection (use a separate sheet if necessary).

I am referring to the sites R125 & R75 of a map dated 17/5/2013 which was discurred at Hatton P.C neesing on 4/7/2013. I am questining the councils inclusion of land which is entrently classed as being Budbrooks but shown as part of an extended Hatton Park concept! Has a decision already been made over the village Boundary changes without any public consultation? The entire siles are in the green-belt and the two houses on it are an integral part of the haulet of houses in the run between the Shell garage and the Hatton Pasic Island. The combined size of these sites would suggest a capacily to build several houses in a row there. My Objections are that the Birningham Road (A4144) is Very narrow at this part, very conjected throughout the dayshire as well as being a fast and dangerms road in the eastly Morning & evenings. Adding Mone housing access at this Stretch of road is clearly not sensible and would only incheure the risk of more accidents on the AHITT. Apart from the 1880es above this is a major rouse to Warnek with this natural green covidor providing the fist impression to unisors. The narrow side backs directly on to the caral towpath with the stanway to Heaven locks formation playing need past in our towns in the influence at the gateway to wassick. This is a highly valued area for walkers, Godiess and townsto. No style of housing development on this sife would resolve my objection

**Support** 

Please set out full details of your objection or representation of support. If objecting, please set out what changes could be made to resolve your objection (use a separate sheet if necessary).

I am referring to the siles R114, R124 eR127 of a Map dated 17/5/2013 which was discussed at Hatton P.C. Meesing on 4/4/2013. The siles are located in Hatton Hill and Hatton Park Justher along the A4177 Brounghan Road away from the Gotheneck by the Shell garage & ugly Bridge Junction. The traffic queues are len of a problem for sise nos 124 x 127 as they are clear. of Hatton Park Island two up to the Estale, there is easier diversion via Hockley Land, Hatton or through the Beausale route. We were informed at the P.C needing that the Hatton Hell siles had porential for around 80 houses. That particular post of Burunghari Road is already developed to an extent with housing and a Public House therefore I would see more scope to develop an extension to Hatton Pask providing the design was very sympathelic to the envionment, let back fine the road and retained all the hedgerows at the reas of the sile. The Nº68 bus could be roused up Bunghay Road then two into Hutton Park by the old Gatehouse. This would also enable visitors to have more chance of visiting Hatton Country World thus bringing greates tousist agreal. The sife Nº RII4 is already within the Hatton Pask deriese and should be utilised if these are no overriding reasons to the contray.

Support

San refessing to the site RIIS of a map desed 17/5/2013 which was discussed at Hatton P.C. Meesing on 4/7/2013. I am concerned about the localing the largest size on the WDC Map that we are told could have the capacity for up to 100 new Romes. This site is very close indeed to a very narrow streich of the A4177 which suffers a high level of daily traffic conjection along inth all the hazards of traffic turning into the Shell garage and at the ugly Bridge Juncian. These is the added restriction in the flow of traffic with the traffic 18 land two towards the centre of Hatton Pask. The sixe cuspently affords a very pleasant rural openiers along the green covidor leading towards Wasniek & helps to importantly provide relief of the traffic pollision along this section of the road. A largely built up asea on this sife would have the landscape and have a greated impact on all the 188 URS previously mentioned Susface water, collection along Bunghan Road arand the sise asea has been caused by earlies building work on Hatton PNK-This is still a hazard to road wress despile regular deain checks esc any building work would need to take account of these 188 ver along with the recommended avoidance of deliberately building new homes in dore proximisy to a perior stasion.
