

Gypsy and Traveller Stratford Road Preferred Options Site Response Form 2014

For Official Use Only

Ref:

13000

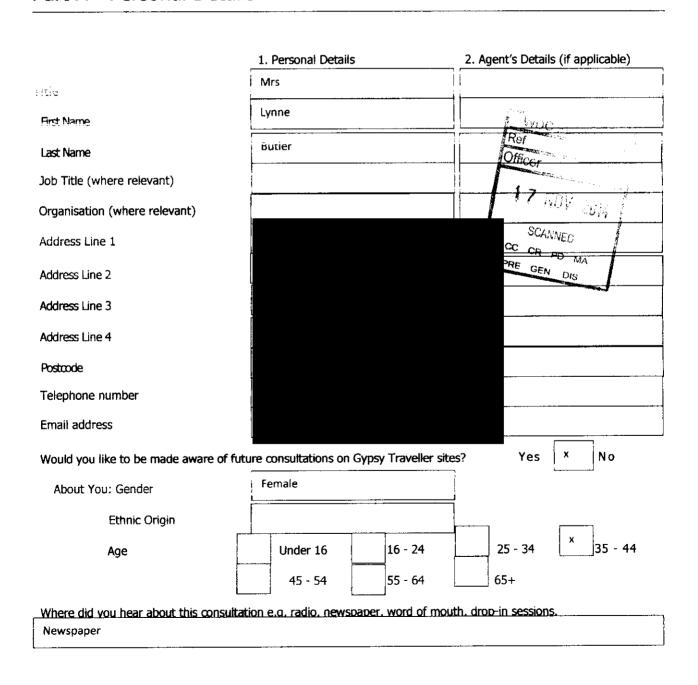

Rep. Ref.

Please use this form if you wish to comment on the Stratford Road Gypsy and Traveller Preferred Options Site.

This form may be photocopied or, alternatively, extra forms can be obtained from the Council's offices or places where the consultation documents have been made available (see back page). You can also respond online using the LDF Consultation System, visit:

or by letter (address on back page)

Part A - Personal Details

Part B - Commenting on the Stratford Road Gypsy and Travelle: Preferred Site

and community facilities; b) the site has good access to the major road network; c) the site is of a surtable size to accommodate between 5 and 15 pitches for permanent sites or 12 pit for transit sites; d) it can be demonstrated that infrastructure requirements can be adequately met; and e) there is potential for the site to be adequately screened. What is the nature of your representation? Support Object Comment Please set out full details of your objection or representation of support with reference to the criteria above. I strongly object to this site for the following reasons: We have two young boys. The local schools are seriously strugging to cope with the number of children already in tocality, and I worry that our younger son wouldn't get a piace at the same school as his brother. The same applied the Doctor's surgery, which is already overcrowed. Local services would not cope. I already have concerns about walking down the Stratford Road and have seen a number of near misses with peor almost not stopping when a car is waiting to turn right in to the road leading up to the farm track. Cars travel far that down the road and believe that the site would increase the risks over a serious inclident. The roads already struggle to accommodate existing traffic volumes at peak times, this would only exacerbate the situation further would also increase the risk of walking or cycling down the Stratford road which is the route my family uses to accional amenities. There are no details in the plan about what commercial use would constitute. The local environment could be put risk. I love the rural feel to Warwick as you approach the town. The gypsy site and commercial site risk destroying the entrance to the town, which to me is a large part of what makes this a special place to live in and to visit. It would an unsightly blot on our beautiful landscape.		n the Draft Local Plan will list the criteria by which Gypsy and Traveller sites will be judged for suitability ability. These are the criteria:
and community facilities; b) the site has good access to the major road network; c) the site is of a suitable size to accommodate between 5 and 15 pitches for permanent sites or 12 pit for transit sites; d) it can be demonstrated that infrastructure requirements can be adequately met; and e) there is potential for the site to be adequately screened. It
In the plan about what commercial use would constitute. The local environment could be put risk. I love the rural feel to Warwick as you approach the town. The gypsy site and commercial site risk destroying the entrance to the town, which to me is a large part of what makes this a special place to live in and to visit. It would an unsightly blot on our beautiful landscape. The site is designated as a level 3 for Flood risk and there are often strong smells from the sewerage works close in the sewera	would a	lso increase the risk of walking or cycling down the Stratford road which is the route my family uses to access
There are no details in the plan about what commercial use would constitute. The local environment could be put risk. I love the rural feel to Warwick as you approach the town. The gypsy site and commercial site risk destroying the entrance to the town, which to me is a large part of what makes this a special place to live in and to visit. It would an unsightly blot on our beautiful landscape. The site is designated as a level 3 for Flood risk and there are often strong smells from the sewerage works close in the sewerage work
