Subject: Radford Semele Neighbourhood Plan

Dear Sir/Madam

I wish to register my total support for RSNP as, stated above, having read the full documentation in paper form. I feel that the local community should have a bigger say in their future environment, particularly with the possibility of future planning regulations being relaxed.

I would also like to comment on two points in the documentation where a company or a person raised objection to the report, having a commercial interest in this area. I find this strange that these people or a company can be so involved in such a document when they do not reside in the area, as the definition of Neighbourhood is ,this locality or vicinity ,

Yours Sincerely

Anthony Hitchcox
