

## Part 1A – Residential Dwellings

### NZC1: The overall % carbon emissions reduction against Building Regulations

Target Emission Rate*(TER) in kgCO <sub>2</sub> /m <sup>2</sup> /yr.	
Dwelling Emission Rate (DER) in kgCO <sub>2</sub> /m <sup>2</sup> /yr.	
Overall % Reduction in CO <sub>2</sub> emissions	
	Version of SAP carbon factors used – confirming that the same carbon factors were used for the TER and DER given above:
Informative:	<p>*Based on the relevant version of Building Regulations Part L as outlined in policy NZC1.</p> <p>These figures should be obtained from calculations using SAP (the Standard Assessment Procedure for domestic buildings).</p> <p>Where multiple house types are proposed information should be presented for each house type – see section 3.23 to 3.29.</p>
