

## Gypsy and Traveller Site Options Response Form 2013

For Official Use Only

Ref:

Rep. Ref.

8280

Please use this form if you wish to comment on the Gypsy and Traveller Site Options.

If you are commenting on multiple sites you will need to complete a separate copy of Part B of this form for each representation.

This form may be photocopied or, alternatively, extra forms can be obtained from the Council's offices or places where the consultation documents have been made available (see back page). You can also respond online using the LDF Consultation System, visit: [www.warwickdc.gov.uk/newlocalplan](http://www.warwickdc.gov.uk/newlocalplan)

Where did you hear about the site?	ward on map	

# Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

The policy in the Draft Local Plan will list the criteria by which Gypsy and Traveller sites will be judged for suitability and sustainability. These are the criteria:

- Convenient access to a GP surgery, school and public transport;
- Avoiding areas with a high risk of flooding;
- Safe access to the road network and provision for parking, turning and servicing on site;
- Avoiding areas where there is the potential for noise and other disturbance;
- Provision of utilities (running water, toilet facilities, waste disposal, etc);
- Avoiding areas where there could be adverse impact on important features of the natural and historic environment; and,
- Sites which can be integrated into the landscape without harming the character of the area.
- Promotes peaceful and integrated co-existence between the site and the local community;
- Avoids placing undue pressure on local infrastructure and services;
- Reflects the extent to which traditional lifestyles (whereby some travellers live and work from the same location thereby omitting many travel to work journeys) can contribute to sustainability.

Please give your views about site suitability below with reference to this list of criteria.

Which site are you responding to?

## Site GT02 – Land abutting the Fosse Way at its junction with the B425

What is the nature of your representation?

### Object

Please set out full details of your objection or representation of support with reference to the criteria above.

• **Convenient access to a GP surgery, school and public transport;**

This site is in excess of 1.5 miles from any GP surgery. The proposed site is outside of the catchment area of Harbury Surgery and the nearest surgery is the Croft Medical Centre in Sydenham which is 3.3 miles away which I understand is full. The next surgery is the Cubbington Road Surgery which is 4.7 miles distant and is not served by direct public transport so there is no convenient access to a surgery.

The position with regard to schooling is similar with Radford Primary School being almost fully subscribed and if the additional hundred houses are built in the village it will be full. This is outside of the Harbury catchment area and Harbury Primary School has had recent issues with too many children already.

The public transport whilst satisfactory is largely irrelevant as the residents are unlikely to use anything other than their own transport. There is a bus stop on the B425 however there is no pedestrian links from that to the potential site.

1. I am commenting on the proposed plan because...

2. The proposed plan is...

3. I am concerned about...

4. I support the proposed plan because...

5. I have suggestions for improvement...

### Comments on the Proposed Plan

#### Objectives

1. The proposed plan should...

2. It is important to...

3. The plan should take into account...

4. I believe that...

5. The plan should be revised to...

## Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

- **Avoiding areas with a high risk of flooding**

No comment

- **Safe access to the road network and provision for parking, turning and servicing on site;**

The proposed 15 pitch site will contain up to 50 vehicles and generate hundreds of traffic movements daily. It is on the junction of two major roads and access into the traffic flow will possibly need highway improvements. It is possibly unwise to introduce even more traffic turns at this major junction and it will certainly add significantly to existing peak time delays. GT02 is sited on the junction of two main roads with high traffic flows and the Fosse Way in particular sees fast traffic despite the nearby speed camera and is a designated High Risk Route by the County Council.

- **Avoiding areas where there is the potential for noise and disturbance**

This site is adjacent the Fosse Way a very busy and noisy main road.

- **Provision of utilities (running water, toilet facilities waste disposal etc);**

The proposed site has no mains sewerage, drainage or gas so fails to meet the criteria. Also the electricity supply is a limited rural line and will possibly need to be upgraded to meet the very considerable increase in demand.

- **Avoiding areas where there could be an adverse impact on important, features of the natural and historic environment;**

This choice of site overlooks the fact that at this point the Fosse Way, as the original Roman road built nearly 2000 years ago is known, is on its original alignment and there is likely to be considerable archaeological remains in the area which will be destroyed by the development. There was also a tollhouse at this point in the 17th and 18th centuries and remains have been found. Nearby there are traditional historic Woodlands which contain rare species so this criteria is not met.

- **Sites which can be integrated into the landscape without harming the character of the area.**

The proposed site will cover 0.8 hectare (8000 m<sup>2</sup>) which is four times the size of the Exhibition Centre and if the Enfusion (consultants) recommendation to include working space is adopted this would possibly increase to 6 times the area of the Exhibition Centre. There will be a large variety of caravans and vehicles on the site so, being in the bottom of the valley, it cannot be integrated into the landscape without harming the visual appearance and character of the area.

- **Promotes peaceful and integrated co-existence between the site and the local community;**

In this respect the local community forms two distinct sections. There is a very small community of some 20 houses within half a mile of the site along the Fosse Way and the far greater community in the village of Radford Semele over 1.5 miles away. It will be difficult to integrate the residents into the local Fosse Way community as with up to 120 residents on site rather than integrate they will actually absorb the local community. This does not meet the criteria of a peaceful and integrated co-existence.

- **Avoids placing undue pressure on local infrastructure and services;**

The proposed site has no mains sewerage, drainage or gas so fails to meet the criteria. Also the electricity supply is a limited rural line and will possibly need to be upgraded to meet the very considerable increase in demand.

- **Reflects the extent to which traditional lifestyles (whereby some travellers live and work from the same location thereby omitting many travel to work journeys) can contribute to sustainability.**

# Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

## Other issues which I consider should be taken into consideration

### Local Business/Employment

There are several businesses located at GT 02 in addition to the Warwickshire Exhibition Centre. They include salad producers, specialist storage, event management and publishing. Collectively they employ between 50 and 60 people and the site would cause significant difficulties for all.

Should this site be chosen, then due to the PERCEPTION of event organisers It is estimated that within two years the Exhibition Centre would lose sufficient events to make it impossible to continue operating and the company itself would cease to exist resulting in upwards of ten permanent job losses and a further 30 event staff losses.

### Tourism and the wider economic situation

It is anticipated that the Exhibition Centre will contribute in the region of £5 million to the local economy in hotel accommodation, restaurants, entertainment, bus and taxi usage over the coming four years. Events attract visitors from a wide area and it is often the case that husbands/wives/partners will use the exhibition bus service to go shopping in Leamington Spa whilst spouses enjoy the exhibitions. This would all be lost if the Exhibition Centre were to close.

### Archaeology and Heritage

GT 02 is located right next to the historic Fosse Way. The road now known as the Fosse Way was built following the Roman invasion in AD 43, nearly 2000 years ago, and has been a major highway throughout the centuries. There was a tollhouse on the junction of the Fosse Way and Southam Road in the 17th and 18th centuries. If GT 02 is approved it is important that a major archaeological dig should take place prior to site work so that the archaeology and heritage of the area can be recovered and safeguarded.

### Urbanisation

GT 02 will involve considerable infrastructure in addition to the actual site. Its proximity to the roundabout may require traffic control and road widening to provide a right turning lane for access. Further features could include bus shelters and a pedestrian crossing and more street lighting would be needed.

### Agriculture

At present the proposed GT02 site is part of an area of some 50 acres of good quality, extensively farmed land. Unauthorised intrusion from GT 02 into the agricultural land could result in contractors not wishing to risk tractors and equipment and this together with crop damage and possible rubbish deposits could result in the land ceasing to be farmed and becoming unsightly.

### Rural Landscape

The area surrounding GT 02 is rural and agricultural in aspect and the proposed site will be a major invasion into the openness of the countryside and will be an irreversible urbanisation of the entire area. **If the site is built, the council will be ill placed to prevent further 'ribbon' development.**

### Animal Welfare

Located close to GT 02 are Fosse Alpaca and Kune Kune Pigs, a business breeding these rare breed livestock. The Alpaca herd numbers 30 animals and the owners are extremely conscious of bio security and the need to protect the animals from diseases such as foot and mouth, bTB and Parvo virus. These diseases can be spread by human trespass and unvaccinated dogs. The animals graze on fields between GT 02 and the Grand Union Canal.

### Ecology and Habitat

GT 02 is close to two historic traditional Woodlands, which provide a habitat for birds and small mammals that would be greatly affected by the proposed site and the possible intrusion and activities of younger residents. It is known to be a habitat for Pipistrelle bats (*Pipistrellus pipistrellus*) and also great crested newts (*Triturus cristatus*), amongst other species.

## Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet

5

of

10

- **Avoiding areas with a high risk of flooding**

The area is prone to flooding. Fields are often under water and livestock and ponies moved accordingly. The area is effectively a flood plain.

Harbury Lane is often flooded and impassable.

- **Safe access to the road network and provision for parking, turning and servicing on site;**

The proposed 15 pitch site will contain up to 50 vehicles and generate hundreds of traffic movements daily. It is on the junction of two major roads and access into the traffic flow will possibly need highway improvements. It is possibly unwise to introduce even more traffic turns at this major junction and it will certainly add significantly to existing peak time delays. GT03 is sited on the junction of two main roads with high traffic flows and the Fosse Way in particular sees fast traffic despite the nearby speed camera and is a designated High Risk Route by the County Council. There have more than 12 Serious Accidents at this junction over the last 3 years.

- **Avoiding areas where there is the potential for noise and disturbance**

This site is adjacent the Fosse Way a very busy and noisy main road.

- **Provision of utilities (running water, toilet facilities waste disposal etc);**

The proposed site has no mains sewerage, drainage or gas so fails to meet the criteria. Also the electricity supply is a limited rural line and will possibly need to be upgraded to meet the very considerable increase in demand.

GT03 is considered by British Telecom to be too far from the Whitnash Telephone Exchange to provide an adequate telephone or internet service (They term it as a long line). They will not upgrade the system resulting in poor telephone connections and intermittent (<1mbs) internet service.

GT03 does not have a reliable mobile phone service. There are no mobile phone networks that provide more than a mediocre service.

- **Avoiding areas where there could be an adverse impact on important, features of the natural and historic environment;**

This choice of site overlooks the fact that at this point the Fosse Way, as the original Roman road built nearly 2000 years ago is known, is on its original alignment and there is likely to be considerable archaeological remains in the area which will be destroyed by the development. There was also a tollhouse nearby in the 17th and 18th centuries and remains have been found. The site would be a blight on the vistas from the Grade 1 Listed building, Chesterton Windmill, which is maintained by Warwickshire County Council. The views from this famous, historic building would be of material consideration should a planning application ever be made.

- **Sites which can be integrated into the landscape without harming the character of the area.**

The proposed site will cover 0.8 hectare (8000 m<sup>2</sup>) which is larger than Barnwell Farm and if the Enfusion (consultants) recommendation to include working space is adopted this would possibly increase to 1.5 times the area of the farm. There will be a large variety of caravans and vehicles on the site so, being in the bottom of the valley, it cannot be integrated into the landscape without harming the visual appearance and character of the area.

The site is also very visible from Chesterton Hill and would undoubtedly harm the character of the wider surrounding area.

- **Promotes peaceful and integrated co-existence between the site and the local community;**

In this respect the local community forms two distinct sections. There is a very small community of some 20 houses within half a mile of the site along the Fosse Way and the far greater community in the villages of Harbury and Whitnash over 1.5 miles away.

It will be difficult to integrate the residents into the local Fosse Way community as with up to 120 residents on site rather than integrate they will actually absorb the local community. This does not meet the criteria of a peaceful and integrated co-existence.

- **Avoids placing undue pressure on local infrastructure and services;**

The proposed site has no mains sewerage, drainage or gas so fails to meet the criteria. Also the electricity supply is a limited rural line and will possibly need to be upgraded to meet the very considerable increase in demand.

- **Reflects the extent to which traditional lifestyles (whereby some travellers live and work from the same location thereby omitting many travel to work journeys) can contribute to sustainability.**

The first part of the report deals with the general situation in the country. It is a very interesting and well-written account of the country's development since 1945. The author is a well-known expert on the subject and his knowledge is reflected in the depth and accuracy of the information provided.

The second part of the report is devoted to a detailed analysis of the country's economic situation. It covers the various sectors of the economy, including agriculture, industry, and services. The author provides a clear and concise summary of the current state of each sector and offers some suggestions for improvement.

The third part of the report discusses the country's social and cultural development. It examines the progress made in education, health care, and social services. The author also discusses the country's cultural heritage and the role of the arts in society.

The fourth part of the report deals with the country's political and administrative structure. It describes the various levels of government and the role of each. The author also discusses the country's foreign relations and its position in the international community.

The final part of the report is a conclusion and a list of recommendations. The author summarizes the main findings of the report and offers some suggestions for the future. The report is a valuable contribution to the understanding of the country's development and is highly recommended for anyone interested in the subject.

# Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

## Other issues which I consider should be taken into consideration

### Local Business/Employment

There are many businesses that operate from GT03 site and the surrounding area and will potentially suffer if the proposed sites go ahead. For example:

1. Will Russell – Farm land being fully utilised for sheep
2. Bob Wright – land being used for arable farming
3. Fosse Garage
4. Rollason Fencing
5. Barnwell Chicken Farm
6. MH Polo Ltd – teaching people to ride ponies
7. Fosse Paddocks Ltd – farming and ponies
8. Warwick Reclamation
9. Mallory Court Hotel
10. Harbury Lane Breakers Yard
11. There are many others.

### Archaeology and Heritage

GT 03 is located right next to the historic Fosse Way. The road now known as the Fosse Way was built following the Roman invasion in AD 43, nearly 2000 years ago, and has been a major highway throughout the centuries. There was a tollhouse on the junction of the Fosse Way and Southam Road in the 17th and 18th centuries. If GT 03 is approved it is important that a major archaeological dig should take place prior to site work so that the archaeology and heritage of the area can be recovered and safeguarded.

### Urbanisation

GT 03 will involve considerable infrastructure in addition to the actual site. Its proximity to the roundabout may require traffic control and road widening to provide a right turning lane for access. Further features could include bus shelters and a pedestrian crossing and more street lighting would be needed.

### Agriculture

At present the proposed GT03 site is part of an area of good quality, extensively farmed land. Unauthorised intrusion from GT 03 into the agricultural land could result in contractors not wishing to risk tractors and equipment and this together with crop damage and possible rubbish deposits could result in the land ceasing to be farmed and becoming unsightly.

### Rural Landscape

The area surrounding GT 03 is rural and agricultural in aspect and the proposed site will be a major invasion into the openness of the countryside and will be an irreversible urbanisation of the entire area. **If the site is built, the council will be ill placed to prevent further 'ribbon' development.**

# Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

The policy in the Draft Local Plan will list the criteria by which Gypsy and Traveller sites will be judged for suitability and sustainability. These are the criteria:

- Convenient access to a GP surgery, school and public transport;
- Avoiding areas with a high risk of flooding;
- Safe access to the road network and provision for parking, turning and servicing on site;
- Avoiding areas where there is the potential for noise and other disturbance;
- Provision of utilities (running water, toilet facilities, waste disposal, etc);
- Avoiding areas where there could be adverse impact on important features of the natural and historic environment; and,
- Sites which can be integrated into the landscape without harming the character of the area.
- Promotes peaceful and integrated co-existence between the site and the local community;
- Avoids placing undue pressure on local infrastructure and services;
- Reflects the extent to which traditional lifestyles (whereby some travellers live and work from the same location thereby omitting many travel to work journeys) can contribute to sustainability.

Please give your views about site suitability below with reference to this list of criteria.

Which site are you responding to?

## Site GT04 – Land at Harbury Lane, Fosse Way

What is the nature of your representation?

### Object

Please set out full details of your objection or representation of support with reference to the criteria above.

• **Convenient access to a GP surgery, school and public transport;**

This site is in excess of 1.5miles from any GP surgery. The proposed site is outside of the catchment area of Harbury Surgery and the nearest surgery is the Warwick Gates Family Health Centre which approximately 3 miles away which I understand is full so there is no convenient access to a surgery.

The position with regard to schooling is similar with GT03 being outside of the Harbury catchment area and Harbury Primary School has had recent issues with too many children already. There are several schools in Whitnash (over 2 miles away) with limited capacity.

The public transport whilst satisfactory is largely irrelevant as the residents are unlikely to use anything other than their own transport. There is a bus stop on the Harbury Lane however there is no pedestrian links from that to the potential site.

For Official Use Only

Ref:

Rep. Ref.

The first part of the report deals with the general situation in the country. It is noted that the economy is still in a state of depression, and that the government has been unable to carry out its program of reconstruction. The report then discusses the various causes of the economic crisis, including the effects of the war, the loss of industrial capacity, and the inflationary pressure of the government's financial policies.

The second part of the report is devoted to a detailed analysis of the agricultural sector. It is pointed out that agriculture is the backbone of the economy, and that any improvement in the country's economic situation must depend on a corresponding improvement in agricultural production. The report identifies several key areas for reform, such as the need to increase investment in agricultural infrastructure, to improve the efficiency of the agricultural sector, and to ensure that farmers have access to the necessary inputs and services.

The third part of the report discusses the social and political situation in the country. It is noted that the population is suffering from widespread poverty and unemployment, and that there is a growing sense of disillusion and despair. The report also points out that the political situation is unstable, and that there is a need for a more democratic and representative government.

Conclusion

In conclusion, the report emphasizes that the country is at a critical juncture. It is clear that the current policies and programs are not working, and that a fundamental change is needed. The report calls for a comprehensive reform program that would address the economic, social, and political challenges facing the country. It stresses that the success of such a program will depend on the commitment and cooperation of all sectors of society.

## Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

- **Avoiding areas with a high risk of flooding**

The area is prone to flooding. Fields are often under water and livestock and ponies moved accordingly. The area is effectively a flood plain.

The Middle Road/ Fosse Way junction is often flooded  
Harbury Lane is often flooded and impassable.

- **Safe access to the road network and provision for parking, turning and servicing on site;**

The proposed 15 pitch site will contain up to 50 vehicles and generate hundreds of traffic movements daily. It is on the junction of two major roads and access into the traffic flow will possibly need highway improvements. It is possibly unwise to introduce even more traffic turns at this major junction and it will certainly add significantly to existing peak time delays. GT04 is sited on the junction of two main roads with high traffic flows and the Fosse Way in particular sees fast traffic despite the nearby speed camera and is a designated High Risk Route by the County Council. There have been more than 12 Serious Accidents at this junction over the last 3 years.

- **Avoiding areas where there is the potential for noise and disturbance**

This site is adjacent the Fosse Way a very busy and noisy main road.

In addition this is adjacent the Birmingham to London Chiltern railway line, causing both noise and a potential danger.

- **Provision of utilities (running water, toilet facilities waste disposal etc);**

The proposed site has no mains sewerage, drainage or gas so fails to meet the criteria. Also the electricity supply is a limited rural line and will possibly need to be upgraded to meet the very considerable increase in demand.

GT04 is considered by British Telecom to be too far from the Whitnash Telephone Exchange to provide an adequate telephone or internet service (They term it as a long line). They will not upgrade the system resulting in poor telephone connections and intermittent (<1mbs) internet service.

GT04 does not have a reliable mobile phone service. There are no mobile phone networks that provide more than a mediocre service.

- **Avoiding areas where there could be an adverse impact on important, features of the natural and historic environment;**

This choice of site overlooks the fact that at this point the Fosse Way, as the original Roman road built nearly 2000 years ago is known, is on its original alignment and there is likely to be considerable archaeological remains in the area which will be destroyed by the development. There was also a tollhouse nearby in the 17th and 18th centuries and remains have been found. The site would be a blight on the vistas from the Grade 1 Listed building, Chesterton Windmill, which is maintained by Warwickshire County Council. # Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

## Other issues which I consider should be taken into consideration

### Local Business/Employment

There are many businesses that operate from GT04 site and the surrounding area and will potentially suffer if the proposed sites go ahead. For example:

1. Will Russell – Farm land being fully utilised for sheep
2. Bob Wright – land being used for arable farming
3. Fosse Garage
4. Rollason Fencing
5. Barnwell Chicken Farm
6. MH Polo Ltd – teaching people to ride ponies
7. Fosse Paddocks Ltd – farming and ponies
8. Warwick Reclamation
9. Mallory Court Hotel
10. Harbury Lane Breakers Yard
11. There are many others.

### Archaeology and Heritage

GT 04 is located right next to the historic Fosse Way. The road now known as the Fosse Way was built following the Roman invasion in AD 43, nearly 2000 years ago, and has been a major highway throughout the centuries. There was a tollhouse on the junction of the Fosse Way and Southam Road in the 17th and 18th centuries. If GT 04 is approved it is important that a major archaeological dig should take place prior to site work so that the archaeology and heritage of the area can be recovered and safeguarded.

### Urbanisation

GT 04 will involve considerable infrastructure in addition to the actual site. Its proximity to the roundabout may require traffic control and road widening to provide a right turning lane for access. Further features could include bus shelters and a pedestrian crossing and more street lighting would be needed.

### Agriculture

At present the proposed GT04 site is part of an area of good quality, extensively farmed land. Unauthorised intrusion from GT 04 into the agricultural land could result in contractors not wishing to risk tractors and equipment and this together with crop damage and possible rubbish deposits could result in the land ceasing to be farmed and becoming unsightly.

### Rural Landscape

The area surrounding GT 04 is rural and agricultural in aspect and the proposed site will be a major invasion into the openness of the countryside and will be an irreversible urbanisation of the entire area. If the site is built, the council will be ill placed to prevent further 'ribbon' development.

## Part B - Commenting on the Gypsy and Traveller Site Options

---

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet  of

Do you have any other suggestions for land within this district that you think would be suitable for use as a Gypsy and Traveller site, bearing in mind the criteria for site identification? If so, please give the location and the land owner's details below:
