Dear Sir/Madam,

I am writing to object to the proposed gypsy and traveller site in Bognorton ref G101 & G107. Major effects is to the location of this site on green belt land and part of a local nursery, there are no local facilities such as doctors, schools hospitals etc within easy reach. Also there are already a number of sites within a few miles of the proposed site outside of green belt land which have better access & facilities and

Would not have an adverse impact on rural business by forcing them to give up part of their land for this development. I work for a small business in the village and since this development has been proposed have been subject to the above mentioned people shoplifting, not a nice experience, and feel that if this site were to go ahead then there would be a lot more of this in the village, resorting to higher house and car insurance. Please listen to our objections, and free us from any developments on green belt land in our village when there are more suitable sites available.

S. PLUMMER.
