Subject: Gypsies and Traveller sites within Bishops Tachbrook Area

I, Scott MacLennan object to the proposed Gypsy and traveller GT03, GT04, GT05, GT06, GT09, GT10 and GT15.

As a regular visitor at Bishops Tachbrook, Warwick and Leamington Spa I for-see this proposal will have following adverse effect on our community.

A. When leaving the M40 already the site already looks dreadful with travellers already in this site, which will damage the local tourism industry.

B. The possible pollution threat to the Tachbrook Brook with GT15 being located in near vicinity.

C. Bishops Tachbrook schools are already oversubscribed and there is no need to put more undue pressure on the local resources.

D. Access to the site could cause further Road traffic collisions with entry and exit leading directly onto a 50 mph road.

Overall there will be an adverse effect on natural and historic environment, crime could increase, local resources will be stretched and Health and Safety compromised.
