

GYPSY TRAVELLER SITE OAKLANDS FARM

9707

I am writing to oppose to the above site. This is not only on a very busy road with gaps to the front which of course can be seen by everyone who either drives or walks past. The locks are on the other side and will not be a safe place if children are going to be on this site and also this will certainly not only be a blot on a beautiful area it will certainly affect the tourists who flock into Warwick each year if these people are around and boats passing on the canal – may feel intimidated by these people as they lead completely different lives to you and I.

They may look after the site but aware that this doesn't always happen and rubbish etc which can increase the rodent activity will not be a welcome addition to the area either.

I for one moved to this area of Hatton Park just under 3 years ago and can assure you I would never moved from Surrey to here if I had known this was going to be in the pipeline – my house will be devalued by at least 20% and cannot see that anyone will want to buy it with a Gypsy Travellers site around the corner and also know that living on my own – I will not feel safe or happy leaving my house empty if I go away.

This will have a big impact on the green belt and also we have no noise on Hatton Park or any trouble at all – this is bound to be the opposite if the above is allowed to go ahead.

As I am still very new to the area I cannot suggest another site but feel these people should be put well away from developments like Hatton Park where there are many young families and will feel intimidated and not able to walk down past the site in safety as we are able to do now.

Yours Faithfully
