To Whom it may concern

re planned new housing around Hampton Magna.

Has the person who came up with this hair brained scheme of 245 new homes around Hampton Magna looked at the bigger picture. As it is at the moment if there are any traffic incidents on either the A46 or the M40 motorway there is complete mayhem throughout the whole of the Warwick area, absolute grid lock occurs. Hampton Magna residents sometimes cannot even get on to the Old Budbrooke Road as it is nose to tail with cars trying to get to the Birmingham Road, and that is only the beginning of their problems.

I keep reading in the local newspapers of all the proposed sites for houses, gypsies and student accommodation in the area, there is huge opposition from the public to all of these, when are the (powers that be) going to get the message! there is enough congestion around here now.

There is land in the area more suitable (but not for the builders) but certainly for the public that can be used without causing all the upheaval to the residents of the local villages, ie Hampton on the Hill and Hampton Magna, for example 11 hectares on the Hampton Road, was for sale, by the farmer not long ago, what is wrong with that site? that would accommodate 500 homes! problem solved, it is open land on the outskirts of Warwick, shops and schools are readily available.

Warwick District Council need to put the people first, to stand up and and to fight for us, after all we the people voted you in to look after our interests, do something for us.

Yours sincerely,

Christine Davies.
