

## Representations

South Warwickshire Local Plan Part 1 – Issues and Options Consultation

HALLAM LAND MANAGEMENT LIMITED (EAST OF EUROPA WAY)

March 2023

- 1. The following representations are made in response to the South Warwickshire Local Plan (SWLP) Part 1 Issues and Options Consultation (January 2023) on behalf of Hallam Land Management Limited (HLM), in respect of Land East of Europa Way, Warwick (the Site), who are acting for the Birmingham Roman Catholic Diocesan Trustees Registered. A separate Call for Sites submission has also been made.
- 2. A summary of these representations has also been submitted to the SWLP Online Consultation Portal, and should be read alongside the supporting documents namely:
  - Emerging Vision which explains how the proposed development of the site would contribute towards achieving the five overarching principles of the SWLP Vision, and includes an Illustrative Masterplan;
  - b. Site Location Plan
  - c. South Warwickshire Housing Need Evidence Base Review Technical Report - this has been prepared to consider the evidence base relating to housing need in South Warwickshire, namely the HEDNA, and provides commentary and guidance on how this issue should be considered as the SWLP evolves.

## **Chapter 3 - Vision and Strategic Objectives**

#### Q-V3.1: Vision for the Local Plan

- 3. HLM consider that the proposed Vision is appropriate in general terms. However, the proposed Vision makes reference to meeting unmet need from neighbouring authorities, and HLM consider it would be more appropriate to reference meeting unmet need from the wider Housing Market Areas.
- 4. Whilst Birmingham and the Black Country authorities are not neighbouring authorities of South Warwickshire, they do form part of the same Housing Market Area and therefore should not be excluded.

# Chapter 4 - Meeting South Warwickshire's Sustainable Development Needs

#### Q-I1: Sustainability Appraisal

- 5. The Site partially sits within the north eastern portion of Broad Location: B.16 Royal Learnington Spa Southwest. Overall, the assessment is positive about the sustainable effects of this area, including the potential for provision of a mix of uses, reducing the need to travel, provision of jobs and homes and avoiding settlement coalescence. However, the following comments should be considered for the next iteration of the SA.
- 6. SA4 should be reconsidered as it is stated that B.16 is not in proximity to a Country Park. The Site is immediately adjacent to Tachbrook Country Park, which is already informally used and subject to improvements. Furthermore, Land East of Europa Way could substantially extend the Country Park.
- 7. SA5 notes the proximity of Grade II Listed Buildings, and recognises that detailed heritage assessments can ensure the setting of heritage assets. It is questioned therefore whether this should be deemed to have a major negative effect.
- 8. A number of the spatial assessments in relation to SA Objectives 10 to 13 should be reconsidered in relation to committed development and that currently under construction. In particular, the land uses at the Asps should be considered, including primary school, park and ride and a local centre. SA12 also suggests B.16 is outside of the target distance to a secondary school. This does not take account of Oakley School, which is within walking distance of the Site.

#### Option S2-C: Intensification

9. Intensification is a way to optimise brownfield land and realise its effectiveness. However, HLM consider that this matter should be dealt with by the SWLP Part 2 Local Plan or Neighbourhood Plans if relevant, so that the implications of applying an intensification policy to a particular area can be assessed in terms of character and deliverability, which are key factors to consider.

10. Intensification is challenging and requires evidence around viability and deliverability before it can be considered to form part of the supply, and as such any intensification potential in the windfall allowance should be avoided.

## Q-S3.1: Urban Capacity Study

- 11. The production of an Urban Capacity Study (UCS, October 2022) to support identification of brownfield land to help deliver the growth needs of South Warwickshire is in accordance with the NPPF<sup>1</sup>. The following points are made in relation to how the UCS considers housing supply in the urban areas. However, it should be noted that the UCS also discusses the SWLP housing requirement and representations are made on those points under Q-H1-1 & 2.
- 12. In relation to housing allocations from the adopted Local Plans, HLM consider that a comprehensive review of all outstanding allocations without planning permission is required to ensure that such sites still meet the definition of developable as set out in the NPPF<sup>2</sup>. In particular, evidence will be required to demonstrate why the UCS suggests the capacity of some of the allocations will increase beyond what is included within the adopted Local Plan. That review and evidence must be published prior to the next iteration of the Plan to demonstrate the capacity from the allocations can be relied upon to meet the housing need.
- 13. The UCS also includes within the supply 795 dwellings on sites which have been submitted to the SWLP Call for Sites process in the urban areas, and are considered to be potentially suitable. As no formal assessment of these submissions has taken place, their inclusion will need to be reviewed once the Housing and Economic Land Availability Assessment (HELAA) is published. Any allowance for such sites must be deducted from the windfall allowance.
- 14. The UCS identifies an additional five sites on vacant land in the urban areas which have not yet been submitted to the Call for Sites process, but are considered potentially suitable for 328 dwellings. There is no certainty around the availability and deliverability of these sites to include them at this stage. Further, on assessment of

\_

<sup>&</sup>lt;sup>1</sup> Paragraph 119 of the National Planning Policy Framework (July 2021)

<sup>&</sup>lt;sup>2</sup> Glossary of the National Planning Policy Framework (July 2021)

these sites there are some serious concerns around their suitability in any case. The UCS also identifies two additional sites on brownfield land within the urban areas, at Talisman Square, Kenilworth (65 dwellings) and Westgate House, Warwick (39 dwellings). As above, these sites have not yet been submitted to the Call for Sites process and so there is no certainty around delivery.

15. Finally, the UCS includes an assessment of the potential windfall supply with reference to the level of windfall delivery across South Warwickshire in the period 2011/12 to 2020/21. However, it is considered that this assessment is limited as it does not detail the sources of windfall supply, nor consider how the planning policy landscape in South Warwickshire may impact future windfall delivery. Whilst a windfall allowance is likely to be acceptable in principle in the SWLP, it should be calculated on the basis of compelling evidence as required by the NPPF<sup>3</sup>.

#### Q-S4.1: Growth of Existing Settlements

16. Yes, growth of existing settlements in South Warwickshire (and on the edge of South Warwickshire) is imperative to deliver the overall growth targets, and achieve the Vision and overarching principles. The need for housing, affordable and specialist housing, jobs, green infrastructure, improved facilities and infrastructure are all generated within the existing settlements. Those needs are best met sustainably adjacent to the settlements, rather than in new settlements.

#### Q-S4.2: Settlement Analysis

17. It is unfortunate the Settlement Analysis Report in dividing the southern urban area Warwick and Leamington Spa; and only focussing on land immediately adjacent to the village of Bishop's Tachbrook means that Land East of Europa Way has not been assessed. Clearly there is time to remedy this unfortunate consequence of subdividing assessment areas. Any assessment is likely to identify the Site as having better than average connectivity, with opportunities to join up with Europa Way, Banbury Road, north to Lower Heathcote and east towards Bishop's Tachbrook. Any assessment should be mindful of the detailed consents at the Asps, Tachbrook Country Park and Oakley Grove and the proposed improvements to the Europa Way corridor.

\_

<sup>&</sup>lt;sup>3</sup> Paragraph 71 of the National Planning Policy Framework (July 2021)

#### Q-S7.2: Refined Spatial Growth Options

- 18. HLM consider a mixture of options will be required to best deliver the growth needs of South Warwickshire for the reasons as set out below.
- 19. Firstly, the results of the high level testing of the five growth options in the supporting Sustainability Appraisal demonstrates that the options perform differently in different areas, with no one option standing out as the best performing option across all areas.
- 20. Secondly, it is important to remember that the assessment set out in the SA is provided at a high level, subject to several caveats, and without consideration of mitigation or deliverability. Options which score less favourably in the SA could therefore actually deliver more sustainable growth on closer examination.
- 21. Finally, given the significant level of growth the SWLP will need to accommodate (see response to Issues H1 and H4 below) this is unlikely to be able to be met sustainably through a single growth strategy.
- 22. HLM support the inclusion of the urban area of Warwick & Learnington in each of the options.

## Q-S10: Other Development Strategy Issues

- 23. More generally, south of Warwick and Leamington was identified in the adopted Warwick Local Plan (2017) as one of the most appropriate locations for strategic growth based on the availability of suitable sites to deliver sustainable urban extensions, lack of overriding constraints, being outside of the Green Belt and the opportunity to support the existing facilities within the towns. Further growth in this area would be consistent with the achievement of sustainable development as set out in national policy.
- 24. HLM have set out an Emerging Vision for its site which shows how development could help achieve the five overarching principles of the Plan. This includes a commitment to designing the development to drive down emissions, and provide new and sustainable nearby services and facilities. This Vision sees the provision of a substantial extension of Tachbrook Country Park to provide a permanent buffer

between Bishop's Tachbrook village and the urban area. HLM would be happy to meet to discuss this further with the Councils.

## **Chapter 5 - Delivering South Warwickshire's Economic Needs**

## Q-E7.1: Core Opportunity Areas

25. HLM support option E7.1a and directing employment growth to the Core Opportunity Area.

## **Chapter 6 - Delivering Homes that meet the needs of all our Communities**

#### Q-H1-1 & 2: Providing the Right Number of New Homes

- 26. Yes, the HEDNA provides a reasonable basis for identifying future levels of housing need across South Warwickshire. However, HLM reserve its position in respect of whether this approach is reasonable for other authorities in Coventry and Warwickshire.
- 27. The NPPF sets out that "to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the Standard Method in national planning guidance unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals"<sup>4</sup>. National policy is therefore supportive of the approach that South Warwickshire Councils are seeking to implement, and as such utilising the HEDNA to inform the local housing need for South Warwickshire is supported.
- 28. It is important, however, to remember that the local housing need is not the same as the housing requirement within the Plan.
- 29. As set out in the appended South Warwickshire Housing Need Evidence Base Review Technical Report commissioned by HLM, whilst HLM support the housing need

<sup>&</sup>lt;sup>4</sup> Paragraph 61 of the National Planning Policy Framework (July 2021)

- figures for South Warwickshire set out in the HEDNA, HLM have some concerns with the approach taken in the HEDNA to economic growth and affordable housing need.
- 30. On economic growth, whilst HLM agree with the demographic modelling assumptions used to calculate economic-led housing need in the HEDNA, the job growth assumptions require updating for the following reasons:
  - The 2022 HEDNA's Cambridge Econometrics (CE) job forecast is outdated (March 2021) and was generated during strict Covid-19 measures in the UK;
  - CE are a robust source of job forecasts but a more recent forecast should be used;
  - Assumed GDP informing the HEDNA's job growth forecasts has now been shown to be an underestimate of growth by the Office for National Statistics;
  - The higher GDP for 2021 and 2022 indicates job growth forecasts would be higher than those used by the HEDNA;
  - Furthermore, job growth experienced in Warwick District and Stratford-on-Avon District during 2011 to 2019 significantly exceeded the CE forecast used to calculate economic-led housing need for the 2022-2043 period;
  - It is unclear from the HEDNA whether economic growth on a number of sites within South Warwickshire are taken account of by the CE baseline projections. If not, these developments should be taken account of;
  - The Council should consider job growth forecasts from Oxford Economics and Experian Economics alongside those from the CE.
- 31. HLM also consider that the significant level of unmet affordable housing needs across South Warwickshire should be taken into account in determining the housing requirement. The submitted analysis finds that the minimum housing need would be 1,609 dwellings per annum in Stratford-on-Avon District and 2,872 dwellings per annum in Warwick to meet affordable housing needs based on past net delivery. Whilst it is recognised that this is significantly greater than the level of housing need set out in the HEDNA and is possibly unsustainable to deliver, this should influence the housing requirement through an appropriate uplift.
- 32. The enclosed analysis should be given consideration as the SWLP emerges, to ensure a sufficient level of housing is planned for across South Warwickshire.

- 33. The UCS suggests that the SWLP housing need equates to 30,750 dwellings, however this figure does not reflect the latest evidence within the HEDNA and needs updating. In addition, the UCS assumes a Plan period which commences in 2025, however this does not align with the base date of the HEDNA and as such a Plan period from 2022 is considered more appropriate to align with the evidence base.
- 34. On the basis of the above, we consider a more appropriate local housing need for the SWLP is 47,012 dwellings over a 28 year plan period.
- 35. In line with the NPPF<sup>5</sup>, it is considered that this figure represents the minimum number of homes needed, and that the Councils should consider whether it is appropriate to set a higher housing requirement in line with national guidance<sup>6</sup>; for example in order to address a significant affordable housing shortfall, support economic development, or address strategic infrastructure requirements which are likely to increase the number of homes needed.
- 36. Further consideration will also need to be given to unmet needs within the Housing Market Area in line with the Duty to Cooperate and the positively prepared test of soundness<sup>7</sup>, which is explored in further detail in response to Issue H4 below.
- 37. Bringing together comments on the UCS and Unmet Needs under Q-H4.2, HLM consider that the SWLP will need to plan for a level of housing growth as set out in the below Table in the order of at least 43,000 dwellings.

<sup>&</sup>lt;sup>5</sup> Paragraph 61 of the National Planning Policy Framework (July 2021)

<sup>&</sup>lt;sup>6</sup> Paragraph 010 Reference ID 2a-010-20201216 of National Guidance

<sup>&</sup>lt;sup>7</sup> Paragraph 35 a) of the National Planning Policy Framework (July 2021)

Table - SWLP Housing Requirement and Supply Calculation

Housing Requirement	
South Warwickshire Minimum Housing Need	47,012 dwellings
Derived from the HEDNA (1,679 x 28 Years)	
Uplift to Minimum Housing Need	TBC – further work required to
	determine whether an uplift is
	appropriate
Contribution Towards Unmet Needs of	TBC – engagement with
Coventry and Birmingham & Black Country	Birmingham/Black Country and
	Coventry required but suggest
	increase of at least 21,000

## Q-H4.2: Accommodating Housing Needs Arising from outside of South Warwickshire

38. It is imperative that that SWLP adequately considers accommodating unmet housing needs which are arising from outside of South Warwickshire, to ensure compliance with the Duty to Cooperate and so the SWLP can demonstrate adherence with the

positively prepared test of soundness set out in the NPPF<sup>8</sup>. It is recognised that national planning policy and law has the potential to change during the course of the preparation of the SWLP, including in relation to the Duty to Cooperate and replacement with an 'alignment policy', however there is no suggestion the requirement for local authorities to address unmet needs arising from within their Housing Market Areas will be removed.

39. We consider that there are two likely sources of unmet housing needs which require consideration in the development of the SWLP: Birmingham and Black Country and Coventry and Warwickshire.

Birmingham and Black Country

- 40. There are clearly significant unmet housing needs arising from the Birmingham and Black Country Housing Market Area which require addressing by this Plan.
- 41. Birmingham published a New Local Plan Issues and Options consultation document in October 2022. This identifies an overall housing need in Birmingham to 2042 (derived from the Standard Method) of some 149,286 dwellings, with total housing supply equating to just 70,871 leaving a shortfall of some 78,415 dwellings.
- 42. There are significant limitations to the potential for such substantial unmet needs to be met by Birmingham's neighbouring authorities due to lack of available land in the Black Country and significant Green Belt coverage in the Black Country and elsewhere (Bromsgrove, Solihull, North Warwickshire, and Lichfield). This was evident in the work undertaken in the now abandoned Black Country Local Plan Review, which was subject to Regulation 18 consultation in 2021 and identified a shortfall in supply across the Black Country of some 28,239 dwellings to 2039.
- 43. There are strong functional relationships between Birmingham and South Warwickshire, in terms of transport connections and commuting patterns, and development in South Warwickshire can contribute towards meeting unmet needs.

\_

<sup>&</sup>lt;sup>8</sup> Paragraph 35 a) of the National Planning Policy Framework (July 2021)

- 44. The Councils clearly need to engage with Birmingham and the Black Country authorities and others to determine an appropriate level of unmet needs to be directed to South Warwickshire. That process needs to be transparent in accordance with paragraph 27 of the NPPF, and effective in accordance with paragraph 35 c) of the NPPF. The lack of any published Statement of Common Ground showing progress made so far by the Councils is a concern that needs to be addressed before the next round of consultation. The Councils need to properly grapple with this issue, and not allow the failings of the last round of Local Plans to be repeated.
- 45. It is noted that the SA has tested the effects of an additional 5,000 to 10,000 dwellings to accommodate Birmingham's unmet needs, however given the numbers discussed above HLM consider 5,000 dwellings to be at the lower end of what could be expected to be accommodated in South Warwickshire. At this stage of the process and in advance of those discussions, as a working assumption for the level of unmet need to be accommodated, the figure should be an additional 10,000 dwellings.

#### Coventry and Warwickshire

- 46. Although the question does not address Coventry's unmet needs, this cannot be ignored. Coventry has by far the greatest level of housing need across Coventry and Warwickshire as set out in the HEDNA, with a housing need calculation derived from the Standard Method of some 3,188 dwellings per annum, adjusted in the HEDNA trend-based approach to 1,964 dwellings per annum. Applying the housing need calculated in the HEDNA to the proposed SWLP Plan period suggested from 2022 to 2050 equates to some 54,992 dwellings to be accommodated to meet Coventry's needs, as a minimum.
- 47. Coventry is highly constrained by a tightly drawn administrative boundary, with potential for brownfield redevelopment but limited opportunity for greenfield development. This was reflected in the adopted Coventry Local Plan (December 2017), where the local housing need in Coventry in the period 2011 to 2031 was calculated at 42,400. The Coventry Local Plan set a housing requirement of just 24,600 (some 60% of its local housing need), leaving a shortfall of some 17,800 dwellings to be met elsewhere.

- 48. It is therefore highly unlikely that Coventry will be able to meet its local housing need identified in the HEDNA of 54,992 dwellings to 2050. Even assuming that Coventry can accommodate a proportion of its local housing need consistent with that set out in the adopted Coventry Local Plan (i.e. 60%), which is itself a challenge, Coventry could only accommodate 33,000 dwellings to 2050 leaving a shortfall of some 22,000 dwellings to be met elsewhere.
- 49. Given South Warwickshire's functional relationship with Coventry, and as South Warwickshire makes up around half of the population of Warwickshire according to the 2021 Census data early releases<sup>9</sup>, an assumption that around 50% of this shortfall will be directed to South Warwickshire is considered appropriate. This equates to approximately 11,000 dwellings and should be taken into consideration at this stage of the process as a working assumption for the level of unmet need to be accommodated.

## Q-H4.3: Accommodating Housing Needs Arising from outside of South Warwickshire

50. With regard to how and where best housing shortfalls should be accommodated in South Warwickshire, HLM consider that settlements or areas with the strongest sustainable transport connections to the conurbations where unmet housing needs are arising should be prioritised. In the case of Coventry's unmet needs, this should include the Warwick and Leamington urban area.

<sup>&</sup>lt;sup>9</sup> How the population changed where you live, Census 2021 - ONS
